

## INDEX OF SUBJECTS

### A

- Abortion, clinical significance of immunoglobulin A *versus* immunoglobulins G and M anti-cardiolipin antibodies in patients with systemic lupus erythematosus, 449
- Acid fast stain, acid fast and fungus stains in bone marrow of HIV-infected patients, need for, 345
- Acidified serum lysis test, congenital dyserythropoietic anemia type II diagnosed in 69-year-old patient with iron overload, 522
- Acinar cell carcinoma, unusual cytoplasmic inclusions in acinar cell carcinoma of pancreas, 345
- Acquired immunodeficiency syndrome  
detection of *Pneumocystis carinii* and, monoclonal antibody and silver staining compared, 13
- Howell-Jolly body-like inclusions in neutrophils of patients with AIDS, 345
- pathologic spectrum of microsporidiosis in AIDS, current concepts of diagnosis of *Encephalitozoon* and *Enterocytozoon* infection and, 345
- Adenocarcinoma  
CA 125 distribution in adenocarcinomas, 167
- colonic, immunoglobulin heavy chain gene rearrangement study by polymerase chain reaction in, 116
- correlation of epidermal growth factor receptor with dysplasia and adenocarcinoma in Barrett's esophagus, 345
- endometrial, correlation of image analysis determination of DNA content of endometrial adenocarcinoma with standard prognostic factors, 345
- frequency of gastric-intestinal type and diffuse-type in Mexico, 139
- HMB-45 expression by adenocarcinomas, 345
- mucin histochemical analysis in interpretation of Barrett's esophagus, 61
- prostatic  
assessment of proliferation in prostatic adenocarcinomas with proliferating cell nuclear antigen, 345
- PCNA in prostatic adenocarcinoma, correlation with established prognostic indicators, 345
- sialosyl-Tn antigen distribution in normal tissues and expression in adenocarcinomas, 167
- Adenosquamous carcinoma, *in situ* hybridization for human papillomavirus in uterine adenosquamous carcinoma with glassy cell features, 180
- Adhesion molecules, E-cadherin expression in normal, benign, and malignant tissues of female genital organs, 76
- Adrenal cortical neoplasms, adrenal cortical neoplasms in children, 382
- Adrenal gland, adrenal hemorrhages and infarction in burn patient autopsies, 345
- Agar-embedded bone marrow particles, immunohistochemical evaluation of agar-embedded bone marrow particles, 345
- Agreement, serum ferritin measurement and degree of agreement using four techniques, 511
- Alkaline phosphatase, intestinal, in gastrointestinal microvillus inclusion disease, 119
- Amyloidosis, excessive fibrinolysis in amyloidosis associated with elevated plasma single-chain urokinase, 534
- Anaplastic large cell lymphoma, Epstein-Barr virus-associated anaplastic large cell lymphoma in renal transplant patients, 312
- Anemia  
congenital dyserythropoietic anemia type II diagnosed in 69-year-old patient with iron overload, 522
- development of alloanti-Jk\* in patient with hemolytic anemia due to autoanti-Jk<sup>b</sup>, 542
- glucose-phosphate isomerase deficiency and nonspherocytic hemolytic anemia, 345
- Angiogenesis  
angiogenesis and cervical squamous cell carcinoma, 345
- correlation of tumor angiogenesis, tumor size, nodal status, and metastasis in lung carcinoma, 345
- Angiography, modulation of vascular function, measured using molecular markers of endothelial function in patients undergoing contrast angiography, 345
- Angiomatosis, skeletal, 345
- Angiotensin II, endothelin-1 release from human endothelial cells *in vitro* evoked by angiotensin II, 345
- Anion gap, 249
- possible matrix effect of lyophilized proficiency testing materials when measuring serum electrolytes and calculating anion gap, 345
- Anti-BCG, assessment of *Mycobacterium avium-intracellulare* infection using blood cultures and bone marrow biopsy specimens stained with Kenyon and Fites stains, anti-BCG, and anti-*M. duvali*, effects of liposomal gentamicin therapy and, 345
- Antibodies. *See also* Autoantibodies  
antibodies of potential clinical significance, detection at 37° Celsius but not by indirect anti-human globulin test, 345
- anti-phospholipid antibodies, 390
- clinical significance of immunoglobulin A *versus* immunoglobulins G and M anti-cardiolipin antibodies in patients with systemic lupus erythematosus, 449
- detection of antibodies to hepatitis C virus in urine, 345
- evaluation of commercial enzyme immunoassays compared to double immunodiffusion for antibodies to extractable nuclear antigens, 345
- monoclonal. *See* Monoclonal antibodies
- Anti-cardiolipin antibodies, clinical significance of immunoglobulin A *versus* immunoglobulins G and M anti-cardiolipin antibodies in patients with systemic lupus erythematosus, 449
- Anticoagulant monitoring, imprecision of prothrombin time monitoring of oral anticoagulation, 237
- Anticoagulation, oral, imprecision of prothrombin time monitoring of oral anticoagulation, 237
- Anticonvulsants, rapid therapeutic monitoring of anticonvulsants in whole blood using Biotrak turbidimetric latex agglutination assay, 345
- Antigens  
analysis of proliferative fraction in infiltrating ductal breast carcinoma using proliferating cell nuclear antigen in formalin-fixed embedded tissue, comparison with S-phase flow cytometric analysis, 345
- anti-neutrophil cytoplasmic antibody to distinguish between vasculitic disease activity and complications of cytotoxic therapy, 345

## INDEX OF SUBJECTS

### A

- Abortion, clinical significance of immunoglobulin A *versus* immunoglobulins G and M anti-cardiolipin antibodies in patients with systemic lupus erythematosus, 449
- Acid fast stain, acid fast and fungus stains in bone marrow of HIV-infected patients, need for, 345
- Acidified serum lysis test, congenital dyserythropoietic anemia type II diagnosed in 69-year-old patient with iron overload, 522
- Acinar cell carcinoma, unusual cytoplasmic inclusions in acinar cell carcinoma of pancreas, 345
- Acquired immunodeficiency syndrome  
detection of *Pneumocystis carinii* and, monoclonal antibody and silver staining compared, 13
- Howell-Jolly body-like inclusions in neutrophils of patients with AIDS, 345
- pathologic spectrum of microsporidiosis in AIDS, current concepts of diagnosis of *Encephalitozoon* and *Enterocytozoon* infection and, 345
- Adenocarcinoma  
CA 125 distribution in adenocarcinomas, 167
- colonic, immunoglobulin heavy chain gene rearrangement study by polymerase chain reaction in, 116
- correlation of epidermal growth factor receptor with dysplasia and adenocarcinoma in Barrett's esophagus, 345
- endometrial, correlation of image analysis determination of DNA content of endometrial adenocarcinoma with standard prognostic factors, 345
- frequency of gastric-intestinal type and diffuse-type in Mexico, 139
- HMB-45 expression by adenocarcinomas, 345
- mucin histochemical analysis in interpretation of Barrett's esophagus, 61
- prostatic  
assessment of proliferation in prostatic adenocarcinomas with proliferating cell nuclear antigen, 345
- PCNA in prostatic adenocarcinoma, correlation with established prognostic indicators, 345
- sialosyl-Tn antigen distribution in normal tissues and expression in adenocarcinomas, 167
- Adenosquamous carcinoma, *in situ* hybridization for human papillomavirus in uterine adenosquamous carcinoma with glassy cell features, 180
- Adhesion molecules, E-cadherin expression in normal, benign, and malignant tissues of female genital organs, 76
- Adrenal cortical neoplasms, adrenal cortical neoplasms in children, 382
- Adrenal gland, adrenal hemorrhages and infarction in burn patient autopsies, 345
- Agar-embedded bone marrow particles, immunohistochemical evaluation of agar-embedded bone marrow particles, 345
- Agreement, serum ferritin measurement and degree of agreement using four techniques, 511
- Alkaline phosphatase, intestinal, in gastrointestinal microvillus inclusion disease, 119
- Amyloidosis, excessive fibrinolysis in amyloidosis associated with elevated plasma single-chain urokinase, 534
- Anaplastic large cell lymphoma, Epstein-Barr virus-associated anaplastic large cell lymphoma in renal transplant patients, 312
- Anemia  
congenital dyserythropoietic anemia type II diagnosed in 69-year-old patient with iron overload, 522
- development of alloanti-Jk\* in patient with hemolytic anemia due to autoanti-Jk<sup>b</sup>, 542
- glucose-phosphate isomerase deficiency and nonspherocytic hemolytic anemia, 345
- Angiogenesis  
angiogenesis and cervical squamous cell carcinoma, 345
- correlation of tumor angiogenesis, tumor size, nodal status, and metastasis in lung carcinoma, 345
- Angiography, modulation of vascular function, measured using molecular markers of endothelial function in patients undergoing contrast angiography, 345
- Angiomatosis, skeletal, 345
- Angiotensin II, endothelin-1 release from human endothelial cells *in vitro* evoked by angiotensin II, 345
- Anion gap, 249
- possible matrix effect of lyophilized proficiency testing materials when measuring serum electrolytes and calculating anion gap, 345
- Anti-BCG, assessment of *Mycobacterium avium-intracellulare* infection using blood cultures and bone marrow biopsy specimens stained with Kenyon and Fites stains, anti-BCG, and anti-*M. duvali*, effects of liposomal gentamicin therapy and, 345
- Antibodies. *See also* Autoantibodies  
antibodies of potential clinical significance, detection at 37° Celsius but not by indirect anti-human globulin test, 345
- anti-phospholipid antibodies, 390
- clinical significance of immunoglobulin A *versus* immunoglobulins G and M anti-cardiolipin antibodies in patients with systemic lupus erythematosus, 449
- detection of antibodies to hepatitis C virus in urine, 345
- evaluation of commercial enzyme immunoassays compared to double immunodiffusion for antibodies to extractable nuclear antigens, 345
- monoclonal. *See* Monoclonal antibodies
- Anti-cardiolipin antibodies, clinical significance of immunoglobulin A *versus* immunoglobulins G and M anti-cardiolipin antibodies in patients with systemic lupus erythematosus, 449
- Anticoagulant monitoring, imprecision of prothrombin time monitoring of oral anticoagulation, 237
- Anticoagulation, oral, imprecision of prothrombin time monitoring of oral anticoagulation, 237
- Anticonvulsants, rapid therapeutic monitoring of anticonvulsants in whole blood using Biotrak turbidimetric latex agglutination assay, 345
- Antigens  
analysis of proliferative fraction in infiltrating ductal breast carcinoma using proliferating cell nuclear antigen in formalin-fixed embedded tissue, comparison with S-phase flow cytometric analysis, 345
- anti-neutrophil cytoplasmic antibody to distinguish between vasculitic disease activity and complications of cytotoxic therapy, 345

- assessment of proliferation in prostatic adenocarcinomas with proliferating cell nuclear antigen, 345
- automation and other recent developments in clinical chemistry, S31
- blood group-related, expression in gastric cancer, intestinal metaplasia, and uninvolved mucosa of stomach, 67
- CD34 antigen, Factor XIIIa and CD34 antigen in hemangioblastomas of central nervous system, 345
- evaluation of commercial enzyme immunoassays compared to double immunodiffusion for antibodies to extractable nuclear antigens, 345
- follow-up of patients with elevated serum prostate-specific antigen levels and negative initial prostate biopsies, 345
- histologic changes in Chinese patients with chronic hepatitis B virus infection after interferon- $\alpha$  therapy, 402
- non-small-cell, expression of proliferating cell nuclear antigen, epidermal growth factor receptor, and cathepsin D in non-small-cell carcinoma, 345
- p53
- expression in neoplasms of uterine corpus, 81
  - p53 and *c-erbB-2* protein expression in breast carcinomas, 408
  - proliferating cell nuclear antigen and p53 antigen expression in gastrointestinal stromal tumors, 345
  - proliferating cell nuclear antigen and p53 antigen expression in gastrointestinal stromal tumors, 345
  - proliferating cell nuclear antigen immunoreactivity in cervical intra-epithelial neoplasia, 345
  - sialosyl-Tn antigen distribution in normal tissues and expression in adenocarcinomas, 167
- Anti-glycosphingolipid autoantibodies, anti-glycosphingolipid autoantibodies in rheumatologic disorders, 345
- Anti-HCV, comparison of Ortho's EIA and RIBA II tests and, 8
- Anti-*M. duvali*, assessment of *Mycobacterium avium-intracellulare* infection using blood cultures and bone marrow biopsy specimens stained with Kenyon and Fites stains, anti-BCG, and anti-*M. duvali*, effects of liposomal gentamicin therapy and, 345
- Anti-neutrophil cytoplasmic antibody, anti-neutrophil cytoplasmic antibody to distinguish between vasculitic disease activity and complications of cytotoxic therapy, 345
- Anti-phospholipid antibodies, 390
- Aorta, detection of lipid conjugated dienes and malondialdehyde in lipids from human fetal aortas, 345
- Arthroplasty, infection *versus* aseptic loosening in revision arthroplasty, predictive value of frozen section and other laboratory tests, 345
- Artifact, clinically significant heparin carryover in ACL 300R, 240
- Atherosclerosis, coronary atherosclerosis with near absence of high-density lipoprotein cholesterol in Tangier disease, 191
- Atrial natriuretic peptide, relations between magnesium levels and atrial natriuretic peptide concentrations, 345
- Atrophy, patterns of keratin 19 expression in normal, metaplastic, condylomatous, atrophic, dysplastic, and malignant cervical squamous epithelium, 419
- Autodesorption techniques, development of alloanti-Jk<sup>a</sup> in patient with hemolytic anemia due to autoanti-Jk<sup>b</sup>, 542
- Autoantibodies
- anti-glycosphingolipid autoantibodies in rheumatologic disorders, 345
  - autoantibodies reacting with subcellular fractions in sera of patients with endometriosis, 345
  - development of alloanti-Jk<sup>a</sup> in patient with hemolytic anemia due to autoanti-Jk<sup>b</sup>, 542
- Autoimmune hemolytic anemia, development of alloanti-Jk<sup>a</sup> in patient with hemolytic anemia due to autoanti-Jk<sup>b</sup>, 542
- Autologous blood donation, increasing autologous blood donation, quality issues and, 345

- Automation
- advances in past decade in automated hematology, S11
  - automated immunohistochemical analysis, S35
  - automated review of blood donor screening test patterns at regional blood center, 334
  - automation and other recent developments in clinical chemistry, S31
  - automation in blood banking, S17
  - automation in clinical microbiology, S22
  - automation in cytopathology, S47
  - automation of *in situ* hybridization, S39
  - of clinical laboratory, S1
  - eosinophilic peroxidase deficiency, cytochemical and ultrastructural characterization of, 615
  - evaluation of CELL-DYN 3000 differential, 603
  - FACSPrep for automated whole-blood lysis and staining as cost-effective tool in flow cytometric analysis for lymphocyte surface markers, 345
  - laboratory automation systems, S3

## B

- Bar codes
- automated immunohistochemical analysis, S35
  - laboratory automation systems, S3
- Barrett's esophagus, 5
- correlation of epidermal growth factor receptor with dysplasia and adenocarcinoma in Barrett's esophagus, 345
  - mucin histochemical analysis in interpretation of, 61
- Basement membrane, pure mucinous breast carcinoma, DNA ploidy and basement membrane laminin distribution in, 345
- B cell, systemic polyclonal B-immunoblastic proliferation with marked peripheral blood and bone marrow plasmacytosis, 222
- B-cell lymphoma
- composite B-cell and T-cell lymphoma, 387
  - monocytoid B-cell lymphoproliferative disorder with leukemic presentation, 345
  - small B-cell lymphoid neoplasms with coexisting T-cell lymphomas, 424
- BCL-2 protooncogene, BCL-2 rearrangement in multiple myeloma in absence of 14;18 translocation, 345
- bcr/abl* gene rearrangement, in chronic myelogenous disorders, 46
- Bedsides glucose testing, cost analysis of bedside glucose testing, 382
- Bedsides whole-blood assay
- bedside whole-blood assay for semiquantitative determination of Factor VIII activity, 345
  - fibrinogen measurement using bedside whole-blood assay, 345
- Bethesda system, for reporting cervical/vaginal cytologic diagnoses, 152
- Biochemistry, immunohistochemical *versus* biochemical determination of enolase isoenzymes in lung cancers, 88
- Biopsy
- assessment of *Mycobacterium avium-intracellulare* infection using blood cultures and bone marrow biopsy specimens stained with Kenyon and Fites stains, anti-BCG, and anti-*M. duvali*, effects of liposomal gentamicin therapy and, 345
  - diagnosis of inflammatory myopathy by percutaneous needle biopsy, demonstration of focal nature of myositis and, 345
  - DNA analysis by flow cytometric analysis of paraffin-embedded fine-needle core biopsy specimens of prostate, 345
  - duodenal biopsy specimens in HIV-infected patients, 466
  - fine-needle aspiration. *See* Fine-needle aspiration
  - histologic changes in liver biopsy specimens produced by recombinant interferon  $\alpha$ -2b therapy for chronic non-A, non-B viral hepatitis, 397

- histopathologic and molecular profile of human cytomegalovirus infections in patients with heart transplants, 205
- open, fine-needle aspiration *versus*, in breast carcinoma, 145
- stereotactic needle-core biopsy of breast lesions, 345
- Biotin**, transplantation of congenital primitive neuroectodermal tumor of fetus to uterus of mother, biotin-labeled chromosome-specific probes applied in, 345
- Biotrak** turbidimetric latex agglutination assay, rapid therapeutic monitoring of anticonvulsants in whole blood using Biotrak turbidimetric latex agglutination assay, 345
- Blastoid cells**, in bone marrow, 139
- Bleaching protocol**, bleaching protocol in histologic analysis of melanized malignant melanoma, 345
- Blood**
- clinical usefulness of calculated and measured cholesterol values in blood, 345
  - Epstein-Barr virus-infected cells in blood or bone marrow of bone marrow transplant patients, 345
  - fibrinogen measurement using bedside whole-blood assay, 345
  - peripheral. *See* Peripheral blood
  - rapid method to isolate platelets from human blood by density gradient centrifugation, 531
  - rapid therapeutic monitoring of anticonvulsants in whole blood using Biotrak turbidimetric latex agglutination assay, 345
- Blood coagulation**, rapid method to isolate platelets from human blood by density gradient centrifugation, 531
- Blood count**
- advances in past decade in automated hematology, S11
  - evaluation of CELL-DYN 3000 differential, 603
- Blood cultures**
- assessment of *Mycobacterium avium-intracellulare* infection using blood cultures and bone marrow biopsy specimens stained with Kenyon and Fites stains, anti-BCG, and anti-*M. duvali*, effects of liposomal gentamicin therapy and, 345
  - bacteria in large activated circulating macrophages on peripheral blood smears taken at or near the time of blood culture collection, 345
- Blood donors**, automated review of blood donor screening test patterns at regional blood center, 334
- Blood group-related antigens**, expression in gastric cancer, intestinal metaplasia, and uninvolved mucosa of stomach, 67
- Blood transfusions**
- increasing autologous blood donation, quality issues and, 345
  - undertransfusion and, 150
- Blood typing**, automation in blood banking, S17
- Bone marrow**
- acid fast and fungus stains in bone marrow of HIV-infected patients, need for, 345
  - archival bone marrow aspirate slide material to construct a patient-specific probe to resolve discordant phenotypes in relapsed acute lymphoblastic leukemia, 345
  - assessment of *Mycobacterium avium-intracellulare* infection using blood cultures and bone marrow biopsy specimens stained with Kenyon and Fites stains, anti-BCG, and anti-*M. duvali*, effects of liposomal gentamicin therapy and, 345
  - blastoid cells in, 139
  - bone marrow dysplasia, 473
  - bone marrow morphology during induction phase of therapy for acute myeloid leukemia, 345
  - DNA fingerprinting and nonradioactive hybridization to assess engraftment in bone marrow transplantation, 345
  - Epstein-Barr virus-infected cells in blood or bone marrow of bone marrow transplant patients, 345
  - immunohistochemical evaluation of agar-embedded bone marrow particles, 345
  - late pulmonary complications in adult bone marrow transplant recipients, 345
  - long-term storage of tumor-involved bone marrow cytopreparations for immunocytological analysis, 345
- Breast carcinoma**
- analysis of proliferative fraction in infiltrating ductal breast carcinoma using proliferating cell nuclear antigen in formalin-fixed embedded tissue, comparison with S-phase flow cytometric analysis, 345
  - favorable prognostic indicators in mucinous carcinoma of breast, 345
  - fine-needle aspiration *versus* open biopsy in, 145
  - histopathology of microinvasive carcinoma of breast, 345
  - p53 and *c-erbB-2* protein expression in breast carcinomas, 408
  - possible malignancy of adenomyoepithelioma of the breast, 598
  - processing and evaluation of breast excision specimens, 125
  - pure mucinous breast carcinoma, DNA ploidy and basement membrane laminin distribution in, 345
  - quantitation of estrogen and progesterone receptors, by immunocytochemical and image analyses, 105
  - simulating fibroadenoma or fibrocystic change by fine-needle aspiration, 155
- Breast lesions**
- fine-needle aspiration, 345
  - malignant adenomyoepithelioma, 598
  - stereotactic needle-core biopsy of breast lesions, 345
- Bronchoalveolar lavage**, detection of *Pneumocystis carinii* and, monoclonal antibody and silver staining compared, 13
- Burns**, adrenal hemorrhages and infarction in burn patient autopsies, 345

## C

CA 125, distribution in adenocarcinomas, 167

## Canada

- non-unit-producing activities in large microbiology laboratory, 287
- proficiency testing of platelet counting in Ontario, 231

Cancer. *See also specific types*

- of colon, cytokeratin and CC49 staining in pericolic lymph nodes of Duke's B colon cancer patients, 345

CAP units, non-unit-producing activities in large microbiology laboratory, 287

Carcinoids, in chronic ulcerative colitis, 112

## Carcinoma

- acinar cell, unusual cytoplasmic inclusions in acinar cell carcinoma of pancreas, 345
- adenosquamous, *in situ* hybridization for human papillomavirus in uterine adenosquamous carcinoma with glassy cell features, 180
- of breast. *See* Breast carcinoma
- cervical, angiogenesis and cervical squamous cell carcinoma, 345
- correlation of tumor angiogenesis, tumor size, nodal status, and metastasis in lung carcinoma, 345
- ductal
  - analysis of proliferative fraction in infiltrating ductal breast carcinoma using proliferating cell nuclear antigen in formalin-fixed embedded tissue, comparison with S-phase flow cytometric analysis, 345
  - size of ductal carcinoma *in situ*, pathologic and mammographic correlative study of, 345
- esophageal, proliferative cell fractions in cytology specimens, 161
- glassy cell, *in situ* hybridization for human papillomavirus in uterine adenosquamous carcinoma with glassy cell features, 180
- of lung
  - correlation of tumor angiogenesis, tumor size, nodal status, and metastasis in lung carcinoma, 345

- immunohistochemical *versus* biochemical determination of enolase isoenzymes in lung cancers, 88
- metastatic, acute megakaryoblastic leukemia simulating, 55
- non-small-cell, expression of proliferating cell nuclear antigen, epidermal growth factor receptor, and cathepsin D in non-small-cell carcinoma, 345
- ovarian, DNA content and proliferative activity in ovarian small-cell carcinomas of hypercalcemic type, 579
- renal cell carcinoma, versus renal oncocytoma, 587
- small cell, DNA content and proliferative activity in ovarian small-cell carcinomas of hypercalcemic type, 579
- squamous cell, angiogenesis and cervical squamous cell carcinoma, 345
- Carryover, clinically significant heparin carryover in ACL 300R, 240
- Castleman's disease
- with progression to malignant lymphoma, 633
- Cathepsin D, expression of proliferating cell nuclear antigen, epidermal growth factor receptor, and cathepsin D in non-small-cell carcinoma, 345
- CC49, cytokeratin and CC49 staining in pericolic lymph nodes of Duke's B colon cancer patients, 345
- CD34 antigen, Factor XIIIa and CD34 antigen in hemangioblastomas of central nervous system, 345
- Celiac disease, characteristics of mitotic figures in jejunal mucosa of patients with celiac disease, 575
- Central nervous system, Factor XIIIa and CD34 antigen in hemangioblastomas of central nervous system, 345
- c-erbB-2*
- c-erbB-2* detection in dysplastic and neoplastic endocervical lesions, 345
  - p53 and *c-erbB-2* protein expression in breast carcinomas, 408
- Cerebrospinal fluid, detection of cytoskeletal proteins immunoreactivity in cerebrospinal fluids of pseudotumor cerebri patients, 345
- Cervical carcinoma, angiogenesis and cervical squamous cell carcinoma, 345
- Cervical diagnoses, Bethesda system for reporting, 152
- Cervical neoplasia
- human papillomavirus infection and cervical neoplasia in human papillomavirus-infected women, 345
  - proliferating cell nuclear antigen immunoreactivity in cervical intra-epithelial neoplasia, 345
- Cervix
- classification of dysplasia of uterine cervix in relation to age in urban medical center serving patients at high risk, 345
  - patterns of keratin 19 expression in normal, metaplastic, condylomatous, atrophic, dysplastic, and malignant cervical squamous epithelium, 419
- Chickenpox, cold agglutinin disease after, 269
- Children
- adrenal cortical neoplasms in children, 382
  - pediatric lymphocyte subset reference ranges, 345
- Chinese heritage, histologic changes in Chinese patients with chronic hepatitis B virus infection after interferon- $\alpha$  therapy, 402
- Chloroacetate esterase, in acute monocytic leukemia, 41
- Cholesterol, clinical usefulness of calculated and measured cholesterol values in blood, 345
- Chondroid tumors, chordomas and chondroid tumors of sphenocciput, 345
- Chordomas, chordomas and chondroid tumors of sphenocciput, 345
- Chromosome-specific probes, transplantation of congenital primitive neuroectodermal tumor of fetus to uterus of mother, biotin-labeled chromosome-specific probes applied in, 345
- Cirrhosis, recurrence of syndrome of primary biliary cirrhosis after orthotopic liver transplantation, 345
- Clinical isolation, evaluation of commercial blood-containing media for cultivation of *Mycobacterium haemophilum*, 282
- Clinical microbiology, automation in clinical microbiology, S22
- Clonality
- in chronic myelogenous disorders, 46
  - primary Epstein-Barr virus infection with clonal T-cell lymphoproliferation, 324
- Clonal proliferation, in colonic adenocarcinoma, immunoglobulin heavy chain gene rearrangement study by polymerase chain reaction in, 116
- Clostridium difficile*, comparison of latex agglutination test for *Clostridium difficile* and rapid enzyme immunoassays for clostridial toxins *versus* tissue culture assay for cytotoxin B in stools of patients suspected of having *C. difficile*-associated diarrhea, 345
- Coagulometer, clinically significant heparin carryover in ACL 300R, 240
- Cocaethylene, as specific marker of cocaine and ethanol coabuse, 345
- Cocaine abuse, cocaethylene as toxicologically active metabolite and specific marker of cocaine and ethanol coabuse, 345
- Cold agglutinin disease, after chickenpox, 269
- Collagen gel culture, growth and differentiation of normal prostatic glandular epithelium in collagen gel culture, 345
- Colon cancer, cytokeratin and CC49 staining in pericolic lymph nodes of Duke's B colon cancer patients, 345
- Colposcopy, predictive value of human papillomavirus DNA detection by filter hybridization and polymerase chain reaction in women with negative results of colposcopic examination, 489
- Commercial media, evaluation of commercial blood-containing media for cultivation of *Mycobacterium haemophilum*, 282
- Communication
- clarity in, 148
  - laboratory-to-physician, laboratory report forms for HIV-1 antibody testing, 199
- Complete blood count, advances in past decade in automated hematology, S11
- Composite lymphoma, small B-cell lymphoid neoplasms with coexisting T-cell lymphomas, 424
- Computer systems
- automation in cytopathology, S47
  - quantitation of estrogen and progesterone receptors, by immunocytochemical and image analyses, 105
- Condyloma, patterns of keratin 19 expression in normal, metaplastic, condylomatous, atrophic, dysplastic, and malignant cervical squamous epithelium, 419
- Congenital disorders, congenital dyserythropoietic anemia type II diagnosed in 69-year-old patient with iron overload, 522
- Conidiobolus coronatus*, fatal disseminated *Conidiobolus coronatus* infection in renal transplant patient, 559
- Conveyors, laboratory automation systems, S3
- Coronary artery bypass surgery, coronary atherosclerosis with near absence of high-density lipoprotein cholesterol in Tangier disease, 191
- Coronary artery disease, coronary atherosclerosis with near absence of high-density lipoprotein cholesterol in Tangier disease, 191
- Cost-effectiveness
- comparative staining of *Pneumocystis carinii* in cytology smears with Diff-Quik, Papanicolaou, and silver methenamine, evaluation of sensitivity, turn-around time, and cost-effectiveness, 345
  - cost analysis of bedside glucose testing, 382
  - FACSPrep for automated whole-blood lysis and staining as cost-effective tool in flow cytometric analysis for lymphocyte surface markers, 345
  - inexpensive image analysis workstation for surgical pathology laboratory, 345

- Cotinine, comparison of radioimmunoassay and enzyme immunoassay for salivary cotinine detection with gas chromatographic assay, 345
- Coulter MAXM, monocyte count in, 269
- Coulter STKS, monocyte count in, 269
- Creatine phosphokinase-myocardial assay
- capillary electrophoresis method for serum creatine phosphokinase-MB, 345
  - non specificity of Kodak creatine phosphokinase-myocardial assay, 345
- Crystal violet, evaluation of commercial blood-containing media for cultivation of *Mycobacterium haemophilum*, 282
- Culture methods, evaluation of commercial blood-containing media for cultivation of *Mycobacterium haemophilum*, 282
- Cytochemistry, eosinophilic peroxidase deficiency, cytochemical and ultrastructural characterization of, 615
- Cytogenetics
- acute megakaryoblastic leukemia simulating carcinoma, 55
  - automation of *in situ* hybridization, S39
- Cytokeratin, cytokeratin and CC49 staining in pericolic lymph nodes of Duke's B colon cancer patients, 345
- Cytology
- automation in cytopathology, S47
  - breast carcinoma simulating fibroadenoma or fibrocystic change by fine-needle aspiration, 155
  - comparative staining of *Pneumocystis carinii* in cytology smears with Diff-Quik, Papanicolaou, and silver methenamine, evaluation of sensitivity, turn-around time, and cost-effectiveness, 345
  - comparison of cytologic diagnoses using conventional Papanicolaou smears and parallel thin-layer cervical preparations using four collection device modalities, 345
  - long-term storage of tumor-involved bone marrow cytopreparations for immunocytological analysis, 345
  - papillary cystic tumor of pancreas, 478
  - proliferative cell fractions in cytology specimens, in esophageal carcinoma, 161
- Cytomegalovirus
- early diagnosis of CMV pneumonitis in lung transplant patients, 345
  - histopathologic and molecular profile of human cytomegalovirus infections in patients with heart transplants, 205
- Cytometry. *See also* Flow cytometry
- limits of DNA cytometry, 275

- Epstein-Barr virus  
 detection of EBV in renal biopsies from patients with idiopathic interstitial nephritis, 345  
 Epstein-Barr virus-associated anaplastic large cell lymphoma in renal transplant patients, 312  
 Epstein-Barr virus-infected cells in blood or bone marrow of bone marrow transplant patients, 345  
 influence of Epstein-Barr virus genomes on patient survival in Hodgkin's disease, 319  
 in lymphoma, 278  
 performance characteristics of Epstein-Barr virus serologic enzyme immunoassay tests, 345  
 primary Epstein-Barr virus infection with clonal T-cell lymphoproliferation, 324  
 rapid detection of Epstein-Barr EBV1 small nuclear RNA in formalin-fixed, paraffin-embedded tissue by RNA *in situ* hybridization, 345
- Erythrocytes  
 automation in blood banking, S17  
 coherence, automation in blood banking, S17  
 method for independent assessment of accuracy of hematology whole-blood calibrators, 623
- Erythroleukemia, acute, proerythroblasts in, prognostic significance, 34

Esophageal carcinoma, proliferative cell fractions in cytology specimens, 161

#### Estrogen receptors

p53 and *c-erbB-2* protein expression in breast carcinomas, 408  
quantitation, by immunocytochemical and image analyses, 105

Ethanol abuse, cocaethylene as toxicologically active metabolite and specific marker of cocaine and ethanol coabuse, 345

Extractable nuclear antigens, evaluation of commercial enzyme immunoassays compared to double immunodiffusion for antibodies to extractable nuclear antigens, 345

### F

FACSPrep, FACSPrep for automated whole-blood lysis and staining as cost-effective tool in flow cytometric analysis for lymphocyte surface markers, 345

Factor VIII, bedside whole-blood assay for semiquantitative determination of Factor VIII activity, 345

Factor XIIIa, Factor XIIIa and CD34 antigen in hemangioblastomas of central nervous system, 345

Familial enteropathy, gastrointestinal microvillus inclusion disease, 119

Ferritin, serum ferritin measurement and degree of agreement using four techniques, 511

#### Fetus

detection of lipid conjugated dienes and malondialdehyde in lipids from human fetal aortas, 345

immunohistochemical characterization of endocrine pancreas in mature teratomas and endocrine fetal pancreas, 345

transplantation of congenital primitive neuroectodermal tumor of fetus to uterus of mother, biotin-labeled chromosome-specific probes applied in, 345

Fibrin degradation product assays, comparison of D-dimer and fibrin degradation product assays to detect disseminated intravascular coagulation, 345

Fibrinogen, fibrinogen measurement using bedside whole-blood assay, 345

Fibrinolysis, excessive fibrinolysis in amyloidosis associated with elevated plasma single-chain urokinase, 534

Fibrocystic change, breast carcinoma simulating fibroadenoma or fibrocystic change by fine-needle aspiration, 155

#### Fine-needle aspiration

breast carcinoma simulating fibroadenoma or fibrocystic change by fine-needle aspiration, 155

of breast lesions, 345

intraoperative fine-needle aspiration of pancreatic lesions, 345

open biopsy *versus*, in breast carcinoma, 145

Fine-needle core biopsy, DNA analysis by flow cytometric analysis of paraffin-embedded fine-needle core biopsy specimens of prostate, 345

Fites stain, assessment of *Mycobacterium avium-intracellulare* infection using blood cultures and bone marrow biopsy specimens stained with Kenyon and Fites stains, anti-BCG, and anti-*M. duvali*, effects of liposomal gentamicin therapy and, 345

Fixed tissue, optimization of DNA extraction for formalin-fixed tissue, in Duchenne muscular dystrophy, 98

#### Flow cytometry

analysis of proliferative fraction in infiltrating ductal breast carcinoma using proliferating cell nuclear antigen in formalin-fixed embedded tissue, comparison with S-phase flow cytometric analysis, 345

comparison of flow cytometric analyses of reticulocytes *versus* manual method, 345

comparison of modifications of Hedley's method for flow cytometric DNA ploidy analysis of paraffin-embedded tissue, 291

comparison of renal oncocytoma and granular renal cell carcinoma, 587

design of flow cytometry patient information system, 345

DNA analysis by flow cytometric analysis of paraffin-embedded fine-needle core biopsy specimens of prostate, 345

DNA content and proliferative activity in ovarian small-cell carcinomas of hypercalcemic type, 579

FACSPrep for automated whole-blood lysis and staining as cost-effective tool in flow cytometric analysis for lymphocyte surface markers, 345

flow cytometry in monitoring immunologic response to nitrogen mustard therapy in rheumatoid arthritis, 345

flow cytometry terminal deoxynucleotidyl transferase analysis, evaluation of Triton-X and methanol permeabilization methods in comparison to immunofluorescence microscopic examination for, 345

flow cytometry *versus* image analysis in prediction of patient outcome, 345

major phenotype of large granular T-cell lymphoproliferative disorder, 516

papillary cystic tumor of pancreas, 478

Fluorescence polarization immunoassay, phenytoin concentrations in predialysis serum compared to postdialysis serum and, in uremia, 19

Follicular lymphoma, follicular lymphoma of compartmentalized small cleaved center cells and mantle zone lymphocytes, 437

#### Formalin-fixed tissue

analysis of proliferative fraction in infiltrating ductal breast carcinoma using proliferating cell nuclear antigen in formalin-fixed embedded tissue, comparison with S-phase flow cytometric analysis, 345

detection of *Pneumocystis carinii* and, monoclonal antibody and silver staining compared, 13

rapid detection of Epstein-Barr EBER1 small nuclear RNA in formalin-fixed, paraffin-embedded tissue by RNA *in situ* hybridization, 345

Frozen sections, infection *versus* aseptic loosening in revision arthroplasty, predictive value of frozen section and other laboratory tests, 345

Fungus stain, acid fast and fungus stains in bone marrow of HIV-infected patients, need for, 345

### G

Gas chromatographic assay, comparison of radioimmunoassay and enzyme immunoassay for salivary cotinine detection with gas chromatographic assay, 345

Gastric cancer, blood group-related antigen expression in, 67

Gastric ulcer, *Helicobacter pylori*-related gastritis and gastric ulcer, 569

Gastritis, *Helicobacter pylori*-related gastritis and gastric ulcer, 569

Gastrointestinal tumors, proliferating cell nuclear antigen and p53 antigen expression in gastrointestinal stromal tumors, 345

Gel test, automation in blood banking, S17

#### Gene rearrangements

comparison of polymerase chain reaction to Southern analysis for detection of immunoglobulin, heavy chain, gene rearrangements, 345

major phenotype of large granular T-cell lymphoproliferative disorder, 516

Gentamicin, assessment of *Mycobacterium avium-intracellulare* infection using blood cultures and bone marrow biopsy specimens stained with Kenyon and Fites stains, anti-BCG, and anti-*M. duvali*, effects of liposomal gentamicin therapy and, 345

Glassy cell carcinoma, *in situ* hybridization for human papillomavirus in uterine adenosquamous carcinoma with glassy cell features, 180

- Glucometer 3, glucose monitoring with Glucometer 3, 345
- Glucose, glucose monitoring with Glucometer 3, sources of variation in, 345
- Glucose-phosphate isomerase, glucose-phosphate isomerase deficiency and nonspherocytic hemolytic anemia, 345
- Glucose testing, cost analysis of bedside glucose testing, 382
- Gluten enteropathy, characteristics of mitotic figures in jejunal mucosa of patients with celiac disease, 575
- Glycated hemoglobin, electrophoresis in monitoring glycated hemoglobin, 345
- Glycoproteins  
CA 125 distribution in adenocarcinomas, 167  
platelet membrane, 455
- Granular renal cell carcinoma, 587
- Growth fraction, p53 and *c-erbB-2* protein expression in breast carcinomas, 408
- Gynecologic tumors  
E-cadherin expression in normal, benign, and malignant tissues of female genital organs, 76  
p53 expression in neoplasms of uterine corpus, 81

black thyroid associated with neoplastic and non-neoplastic diseases, 345  
detection of *Pneumocystis carinii* and, monoclonal antibody and silver staining compared, 13  
mucin histochemical analysis in interpretation of Barrett's esophagus, 61
- Histology, histologic changes in Chinese patients with chronic hepatitis B virus infection after interferon- $\alpha$  therapy, 402
- Histopathology  
histopathology of microinvasive carcinoma of breast, 345  
reliability of histopathologic grading systems in prehisterectomy curettage in endometrial cancer, 345
- HMB-45, HMB-45 expression by adenocarcinomas, 345
- Hodgkin's disease, influence of Epstein-Barr virus genomes on patient survival in Hodgkin's disease, 319
- Howell-Jolly bodies, Howell-Jolly body-like inclusions in neutrophils of patients with AIDS, 345
- Human cytomegalovirus, histopathologic and molecular profile of human cytomegalovirus infections in patients with heart transplants, 205
- Human immunodeficiency virus  
acid fast and fungus stains in bone marrow of HIV-infected patients, need for, 345  
duodenal biopsy specimens in HIV-infected patients, 466  
laboratory report forms for HIV-1 antibody testing, 199  
prevalence of enteric pathogens in HIV-related diarrhea in Midwest, 345

## Human papillomavirus

- detection of human papillomavirus type 16 in vulvar dystrophies, 345
- distribution of human papillomavirus types in archival tissues, 345
- human papillomavirus infection and cervical neoplasia in human papillomavirus-infected women, 345
- human papillomavirus-related papillomas of male urethra, 345
- predictive value of human papillomavirus DNA detection by filter hybridization and polymerase chain reaction in women with negative results of colposcopic examination, 489
- in situ* hybridization for human papillomavirus in uterine adenocarcinoma with glassy cell features, 180
- Human tissue, sialosyl-Tn antigen distribution in normal tissues and expression in adenocarcinomas, 167
- Hunter syndrome, molecular genetics of Hunter syndrome, characterization of mutations in gene encoding human iduronate-2-sulfatase, 345
- Hybridization
  - DNA fingerprinting and nonradioactive hybridization to assess engraftment in bone marrow transplantation, 345
  - in situ*. See *In situ* hybridization
  - predictive value of human papillomavirus DNA detection by filter hybridization and polymerase chain reaction in women with negative results of colposcopic examination, 489

## I

- Identification systems, automation in clinical microbiology, S22
- Idiopathic thrombocytopenic purpura, refractory thrombocytopenia, 502
- Iduronate-2-sulfatase, molecular genetics of Hunter syndrome, characterization of mutations in gene encoding human iduronate-2-sulfatase, 345
- Image analysis
  - automation in cytopathology, S47
  - correlation of image analysis determination of DNA content of endometrial adenocarcinoma with standard prognostic factors, 345
  - DNA aneuploidy in endometriosis, image analysis study of, 345
  - DNA content and tumor proliferative activity of adult-type ovarian granulosa cell tumors by image analysis, 345
  - flow cytometry *versus* image analysis in prediction of patient outcome, 345
  - inexpensive image analysis workstation for surgical pathology laboratory, 345
- Image cytometry, comparative DNA analysis of solid tumors by flow cytometric and image analyses of touch imprints and flow cell suspensions, 296
- Image processing, basic principles of, 493
- Immunoblast, systemic polyclonal B-immunoblastic proliferation with marked peripheral blood and bone marrow plasmacytosis, 222
- Immunoblot assay, recombinant immunoblot assay in assessment of hepatitis C virus infections, 345
- Immunoconcentration, automation in blood banking, S17
- Immunocytology, long-term storage of tumor-involved bone marrow cytopreparations for immunocytological analysis, 345
- Immunofluorescence, flow cytometry terminal deoxynucleotidyl transferase analysis, evaluation of Triton-X and methanol permeabilization methods in comparison to immunofluorescence microscopic examination for, 345
- Immunogenotyping, follicular lymphoma of compartmentalized small cleaved center cells and mantle zone lymphocytes, 437
- Immunoglobulin(s)
  - A, clinical significance of immunoglobulin A *versus* immunoglobulins G and M anti-cardiolipin antibodies in patients with systemic lupus erythematosus, 449
  - comparison of polymerase chain reaction to Southern analysis for detection of immunoglobulin, heavy chain, gene rearrangements, 345
  - evaluation of serum immunoglobulins by protein electrophoresis and rate nephelometry before and after therapeutic plasma exchange, 243
  - F-1, multiple myeloma growth and metabolism, response to insulin and IGF-1, 345
  - G, clinical significance of immunoglobulin A *versus* immunoglobulins G and M anti-cardiolipin antibodies in patients with systemic lupus erythematosus, 449
  - M, clinical significance of immunoglobulin A *versus* immunoglobulins G and M anti-cardiolipin antibodies in patients with systemic lupus erythematosus, 449
- Immunoglobulin heavy chain gene rearrangement, in colonic adenocarcinoma, polymerase chain reaction study of, 116
- Immunogold labeling, prefixation, preembedding immunogold labeling of live human sperm, 345
- Immunohistochemistry
  - automated immunohistochemical analysis, S35
  - blood group-related antigen expression in gastric cancer, intestinal metaplasia, and uninvolved mucosa of stomach, 67
  - CA 125 distribution in adenocarcinomas, 167
  - chordomas and chondroid tumors of sphenociput, 345
  - detection of *Pneumocystis carinii* and, monoclonal antibody and silver staining compared, 13
  - in hairy cell leukemia, diagnosis of bone marrow involvement in paraffin-embedded sections, with monoclonal antibody DBA.44, 26
  - histologic changes in Chinese patients with chronic hepatitis B virus infection after interferon- $\alpha$  therapy, 402
  - histopathologic and molecular profile of human cytomegalovirus infections in patients with heart transplants, 205
  - immunohistochemical characterization of endocrine pancreas in mature teratomas and endocrine fetal pancreas, 345
  - immunohistochemical evaluation of agar-embedded bone marrow particles, 345
  - immunohistochemical *versus* biochemical determination of enolase isoenzymes in lung cancers, 88
  - p53 and *c-erbB-2* protein expression in breast carcinomas, 408
  - papillary cystic tumor of pancreas, 478
  - quantitation of estrogen and progesterone receptors, 105
  - sialosyl-Tn antigen distribution in normal tissues and expression in adenocarcinomas, 167
  - sinonasal hemangiopericytoma, light microscopic and immunohistochemical features of, 345
  - stromal tumors of small intestine, clinicopathologic and immunohistochemical studies of, 345
- Immunonephelometry, evaluation of serum immunoglobulins by protein electrophoresis and rate nephelometry before and after therapeutic plasma exchange, 243
- Immunophenotyping
  - diagnostic panel for immunophenotyping B-chronic lymphocytic leukemia, 345
  - follicular lymphoma of compartmentalized small cleaved center cells and mantle zone lymphocytes, 437
- Immunoreactivity
  - detection of cytoskeletal proteins immunoreactivity in cerebrospinal fluids of pseudotumor cerebri patients, 345
  - proliferating cell nuclear antigen immunoreactivity in cervical intraepithelial neoplasia, 345
- Indirect anti-human globulin test, antibodies of potential clinical significance, detection at 37° Celsius but not by indirect anti-human globulin test, 345

Infarction, adrenal hemorrhages and infarction in burn patient autopsies, 345

# Infection

infection *versus* aseptic loosening in revision arthroplasty, predictive value of frozen section and other laboratory tests, 345

primary and recurrent, histopathologic and molecular profile of human cytomegalovirus infections in patients with heart transplants, 205

Infectious mononucleosis, fatal, primary Epstein-Barr virus infection with clonal T-cell lymphoproliferation, 324

Infective endocarditis, *Pastuerella multocida* endocarditis, 565

Inflammatory bowel disease, multiple microcarcinoids in, 112

# In situ hybridization

automation of *in situ* hybridization, S39

for human papillomavirus in uterine adenosquamous carcinoma with glassy cell features, 180

primary Epstein-Barr virus infection with clonal T-cell lymphoproliferation, 324

rapid detection of Epstein-Barr EBER1 small nuclear RNA in formalin-fixed, paraffin-embedded tissue by RNA *in situ* hybridization, 345

# Instrumentation

advances in past decade in automated hematology, S11

method for independent assessment of accuracy of hematology whole-blood calibrators, 623

Insulin, multiple myeloma growth and metabolism, response to insulin and IGF-1, 345

Interactive display, efficacy of real-time interactive display of stat workload information, 345

Interchangeability, serum ferritin measurement and degree of agreement using four techniques, S11

# Interferon

$\alpha$ , histologic changes in Chinese patients with chronic hepatitis B virus infection after interferon- $\alpha$  therapy, 402

histologic changes in liver biopsy specimens produced by recombinant interferon  $\alpha$ -2b therapy for chronic non-A, non-B viral hepatitis, 397

Intermediate lymphocytic lymphoma, follicular lymphoma of compartmentalized small cleaved center cells and mantle zone lymphocytes, 437

Interphase cytogenetics, automation of *in situ* hybridization, S39

Interstitial nephritis, detection of EBV in renal biopsies from patients with idiopathic interstitial nephritis, 345

# Intestinal metaplasia

blood group-related antigen expression in, 67

mucin histochemical analysis in interpretation of, 61

Intravascular oxygenation device, thrombus formation on intravascular oxygenation device, 345

Iron overload, congenital dyserythropoietic anemia type II diagnosed in 69-year-old patient with iron overload, 522

Isolated thrombocytopenia, refractory thrombocytopenia, 502

# J

Jejunal mucosa, characteristics of mitotic figures in jejunal mucosa of patients with celiac disease, 575

# K

Kenyon stain, assessment of *Mycobacterium avium-intracellulare* infection using blood cultures and bone marrow biopsy specimens stained with Kenyon and Fites stains, anti-BCG, and anti-*M. duvali*, effects of liposomal gentamicin therapy and, 345

# Keratin

19, patterns of keratin 19 expression in normal, metaplastic, condylomatous, atrophic, dysplastic, and malignant cervical squamous epithelium, 419

vimentin and keratin staining in low-grade granular renal neoplasms, 345

# Ki-67

p53 and *c-erbB-2* protein expression in breast carcinomas, 408

proliferative cell fractions in cytology specimens, in esophageal carcinoma, 161

Kidd autoantibodies, development of alloanti-Jk\* in patient with hemolytic anemia due to autoanti-Jk<sup>b</sup>, 542

# Kidney

detection of EBV in renal biopsies from patients with idiopathic interstitial nephritis, 345

Epstein-Barr virus-associated anaplastic large cell lymphoma in renal transplant patients, 312

fatal disseminated *Conidiobolus coronatus* infection in renal transplant patient, 559

*Pastuerella multocida* endocarditis, 565

serum anodal trypsinogen as marker of pancreas rejection in pancreaticoduodenal renal allografts, 345

vimentin and keratin staining in low-grade granular renal neoplasms, 345

Kirby-Bauer system, comparison of Kirby-Bauer, Microscan, Pasco, and Vitek systems for detection of methicillin-resistant *Staphylococcus aureus*, 345

# L

Laboratory reporting, laboratory report forms for HIV-1 antibody testing, 199

Laboratory-to-physician communication, laboratory report forms for HIV-1 antibody testing, 199

Laminin, pure mucinous breast carcinoma, DNA ploidy and basement membrane laminin distribution in, 345

Large cell lymphoma, anaplastic, Epstein-Barr virus-associated anaplastic large cell lymphoma in renal transplant patients, 312

# Latex agglutination

comparison of latex agglutination test for *Clostridium difficile* and rapid enzyme immunoassays for clostridial toxins *versus* tissue culture assay for cytotoxin B in stools of patients suspected of having *C. difficile*-associated diarrhea, 345

rapid therapeutic monitoring of anticonvulsants in whole blood using Biotrak turbidimetric latex agglutination assay, 345

# Lead poisoning

childhood lead intoxications via home use of traditional, low-fired Mexican pottery, 345

in inner city children in Washington, DC, 345

# Leukemia

acute, proerythroblasts in, prognostic significance, 34

acute infantile, acute megakaryoblastic leukemia in infants with t(1;22)(p13;q13) abnormality, 214

acute lymphoblastic

archival bone marrow aspirate slide material to construct a patient-specific probe to resolve discordant phenotypes in relapsed acute lymphoblastic leukemia, 345

hand mirror variant of adult acute lymphoblastic leukemia, 526

acute megakaryoblastic

acute megakaryoblastic leukemia in infants with t(1;22)(p13;q13) abnormality, 214

carcinoma simulated by, 55

acute monocytic, with chloroacetate esterase positivity, 41

- acute myeloid
  - bone marrow morphology during induction phase of therapy for acute myeloid leukemia, 345
  - with chloroacetate esterase positivity, 41
  - expression of BA-1(CD24) predicting monocytic lineage in acute myeloid leukemia, 345
  - use of monoclonal antibodies against primary myeloid granules in normal and leukemic cells, 430
- chronic lymphocytic
  - diagnostic panel for immunophenotyping B-chronic lymphocytic leukemia, 345
  - small B-cell lymphoid neoplasms with coexisting T-cell lymphomas, 424
- chronic myelogenous, DNA analysis in diagnosis of, 46
- hairy cell, diagnosis of bone marrow involvement in paraffin-embedded sections, with monoclonal antibody DBA.44, 26
- monocytoid B-cell lymphoproliferative disorder with leukemic presentation, 345
- polymerase chain reaction detection of myeloperoxidase mRNA in leukemic cells from Wright-stained or unstained smears, 345
- Leukocyte differential, eosinophilic peroxidase deficiency, cytochemical and ultrastructural characterization of, 615
- Lewis staining, Peanut agglutinin and Lewis staining of peripheral T-cell lymphomas, 345
- Light microscopy, sinonasal hemangiopericytoma, light microscopic and immunohistochemical features of, 345
- Lipid conjugated dienes, detection of lipid conjugated dienes and malondialdehyde in lipids from human fetal aortas, 345
- Liver
  - evidence that hepatitis D virus needs hepatitis B virus to cause hepatocellular damage, 554
  - histologic changes in liver biopsy specimens produced by recombinant interferon  $\alpha$ -2b therapy for chronic non-A, non-B viral hepatitis, 397
  - recurrence of syndrome of primary biliary cirrhosis after orthotopic liver transplantation, 345
- Low-density lipoprotein, coronary atherosclerosis with near absence of high-density lipoprotein cholesterol in Tangier disease, 191
- Lung
  - early diagnosis of CMV pneumonitis in lung transplant patients, 345
  - late pulmonary complications in adult bone marrow transplant recipients, 345
  - pulmonary smooth muscle and myofibroblastic proliferations, 345
- Lung carcinoma
  - correlation of tumor angiogenesis, tumor size, nodal status, and metastasis in lung carcinoma, 345
  - immunohistochemical *versus* biochemical determination of enolase isoenzymes in lung cancers, 88
- Lupus inhibitors, evaluation of DVV test in detection of lupus inhibitors in plasma, 345
- Lymph nodes
  - giant lymph node hyperplasia, in Castleman's disease, 630
  - pathology of, follicular lymphoma of compartmentalized small cleaved center cells and mantle zone lymphocytes, 437
  - pericolic, cytokeratin and CC49 staining in pericolic lymph nodes of Duke's B colon cancer patients, 345
- Lymphocytes
  - FACSprep for automated whole-blood lysis and staining as cost-effective tool in flow cytometric analysis for lymphocyte surface markers, 345
  - pediatric lymphocyte subset reference ranges, 345
- Lymphocytosis, major phenotype of large granular T-cell lymphoproliferative disorder, 516
- Lymphoepithelial cyst, of pancreas, 188
- Lymphoma
  - composite B-cell and T-cell lymphoma, 387
  - Epstein-Barr virus in, 278
  - follicular lymphoma of compartmentalized small cleaved center cells and mantle zone lymphocytes, 437
  - follicular non-Hodgkin's lymphoma complicating Castleman's disease, 633
  - large cell, anaplastic, Epstein-Barr virus-associated anaplastic large cell lymphoma in renal transplant patients, 312
  - monocytoid B-cell lymphoproliferative disorder with leukemic presentation, 345
  - morphology of postcardiac transplant lymphomas, 345
  - Peanut agglutinin and Lewis staining of peripheral T-cell lymphomas, 345
  - progressing from Castleman's disease, 633
  - red pulp splenic infiltrates in peripheral T-cell lymphomas diagnosed by splenectomy, 345
  - small B-cell lymphoid neoplasms with coexisting T-cell lymphomas, 424
- Lymphoproliferative disorders
  - major phenotype of large granular T-cell lymphoproliferative disorder, 516
  - monocytoid B-cell lymphoproliferative disorder with leukemic presentation, 345
  - systemic polyclonal B-immunoblastic proliferation with marked peripheral blood and bone marrow plasmacytosis, 222
  - T-cell, primary Epstein-Barr virus infection with clonal T-cell lymphoproliferation, 324
- Lympholyzed proficiency testing materials, possible matrix effect of lympholyzed proficiency testing materials when measuring serum electrolytes and calculating anion gap, 345

## M

- Machine vision, laboratory automation systems, S3
- Macrophages, bacteria in large activated circulating macrophages on peripheral blood smears taken at or near the time of blood culture collection, 345
- Magnesium, relations between magnesium levels and atrial natriuretic peptide concentrations, 345
- Malondialdehyde, detection of lipid conjugated dienes and malondialdehyde in lipids from human fetal aortas, 345
- Mammography, size of ductal carcinoma *in situ*, pathologic and mammographic correlative study of, 345
- Mantle-zone lymphoma, follicular lymphoma of compartmentalized small cleaved center cells and mantle zone lymphocytes, 437
- Megakaryopoiesis, dysplastic megakaryopoiesis with thrombocytopenia and chromosomal aberration, 227
- Melanoma, bleaching protocol in histologic analysis of melanized malignant melanoma, 345
- Metaplasia, patterns of keratin 19 expression in normal, metaplastic, condylomatous, atrophic, dysplastic, and malignant cervical squamous epithelium, 419
- Metastasis
  - acute megakaryoblastic leukemia simulating metastatic carcinoma, 55
  - correlation of tumor angiogenesis, tumor size, nodal status, and metastasis in lung carcinoma, 345
  - E-cadherin expression in normal, benign, and malignant tissues of female genital organs, 76

- transplantation of congenital primitive neuroectodermal tumor of fetus to uterus of mother, biotin-labeled chromosome-specific probes applied in, 345
- Methanol permeabilization methods, flow cytometry terminal deoxynucleotidyl transferase analysis, evaluation of Triton-X and methanol permeabilization methods in comparison to immunofluorescence microscopic examination for, 345
- Microcarcinoids, in chronic ulcerative colitis, 112
- Microplates, automation in blood banking, S17
- Microscan system, comparison of Kirby-Bauer, Microscan, Pasco, and Vitek systems for detection of methicillin-resistant *Staphylococcus aureus*, 345
- Microsporidiosis, pathologic spectrum of microsporidiosis in AIDS, current concepts of diagnosis of *Encephalitozoon* and *Enterocytozoon* infection and, 345
- Microvillus inclusion, in gastrointestinal microvillus inclusion disease, 119
- Mitosis, characteristics of mitotic figures in jejunal mucosa of patients with celiac disease, 575
- Mixed leukemia, acute lymphoblastic, 526
- Molecular genetics  
   automation of *in situ* hybridization, S39  
   molecular genetics of Hunter syndrome, characterization of mutations in gene encoding human iduronate-2-sulfatase, 345
- Molecular hybridization, histopathologic and molecular profile of human cytomegalovirus infections in patients with heart transplants, 265
- Monoclonal antibodies  
   automation and other recent developments in clinical chemistry, S31  
   DBA.44, in hairy cell leukemia, diagnosis of bone marrow involvement in paraffin-embedded sections, 26  
   detection of *Pneumocystis carinii* and, monoclonal antibody and silver staining compared, 13  
   use of monoclonal antibodies against primary myeloid granules in normal and leukemic cells, 430
- Monoclonal gammopathy, evaluation of serum immunoglobulins by protein electrophoresis and rate nephelometry before and after therapeutic plasma exchange, 243
- Monocyte count, in Coulter STKS and MAXM, 269
- Morphology, bone marrow morphology during induction phase of therapy for acute myeloid leukemia, 345
- Morphometry, *Helicobacter pylori*-related gastritis and gastric ulcer, 569
- Multichannel analyzers, automation and other recent developments in clinical chemistry, S31
- Multinuclearity, congenital dyserythropoietic anemia type II diagnosed in 69-year-old patient with iron overload, 522
- Multiple myeloma  
   BCL-2 rearrangement in multiple myeloma in absence of 14;18 translocation, 345  
   multiple myeloma growth and metabolism, response to insulin and IGF-1, 345  
   multiple myeloma with tadpolelike cells and rosette formation, 630
- Muscular dystrophy, Duchenne, optimization of DNA extraction for formalin-fixed tissue, 98
- Mycobacterium avium-intracellulare*, assessment of *Mycobacterium avium-intracellulare* infection using blood cultures and bone marrow biopsy specimens stained with Kenyon and Fites stains, anti-BCG, and anti-*M. duvali*, effects of liposomal gentamicin therapy and, 345
- Mycobacterium haemophilum*, evaluation of commercial blood-containing media for cultivation of, 282
- Myelodysplasia, dysplastic megakaryopoiesis with thrombocytopenia and chromosomal aberration, 227
- Myelodysplastic syndrome, refractory thrombocytopenia, 502
- Myeloid granules, use of monoclonal antibodies against primary myeloid granules in normal and leukemic cells, 430
- Myeloma  
   BCL-2 rearrangement in multiple myeloma in absence of 14;18 translocation, 345  
   multiple myeloma growth and metabolism, response to insulin and IGF-1, 345
- Myoepithelioma of the breast, 598
- Myeloperoxidase, polymerase chain reaction detection of myeloperoxidase mRNA in leukemic cells from Wright-stained or unstained smears, 345
- Myeloproliferative disorders, chronic, DNA analysis in diagnosis of, 46
- Myofibroblastic proliferations, pulmonary smooth muscle and myofibroblastic proliferations, 345
- Myopathy, diagnosis of inflammatory myopathy by percutaneous needle biopsy, demonstration of focal nature of myositis and, 345
- Myositis, diagnosis of inflammatory myopathy by percutaneous needle biopsy, demonstration of focal nature of myositis and, 345
- N
- Natural killer cells, major phenotype of large granular T-cell lymphoproliferative disorder, 516
- NCAM, immunohistochemical *versus* biochemical determination of enolase isoenzymes in lung cancers, 88
- Needle-core biopsy, stereotactic needle-core biopsy of breast lesions, 345
- Neoplasia. *See also specific neoplasias*  
   adrenal cortical neoplasms in children, 382  
   black thyroid associated with neoplastic and non-neoplastic diseases, 345  
   *c-erbB-2* detection in dysplastic and neoplastic endocervical lesions, 345  
   cervical, human papillomavirus infection and cervical neoplasia in human papillomavirus-infected women, 345  
   proliferating cell nuclear antigen immunoreactivity in cervical intraepithelial neoplasia, 345  
   small B-cell lymphoid neoplasms with coexisting T-cell lymphomas, 424  
   vimentin and keratin staining in low-grade granular renal neoplasms, 345
- Nephritis, detection of EBV in renal biopsies from patients with idiopathic interstitial nephritis, 345
- Neuroendocrine lung tumors, immunohistochemical *versus* biochemical determination of enolase isoenzymes in lung cancers, 88
- Neuroendocrine markers, immunohistochemical *versus* biochemical determination of enolase isoenzymes in lung cancers, 88
- Neutropenia, major phenotype of large granular T-cell lymphoproliferative disorder, 516
- Neutrophils, Howell-Jolly body-like inclusions in neutrophils of patients with AIDS, 345
- Nitrogen mustard, flow cytometry in monitoring immunologic response to nitrogen mustard therapy in rheumatoid arthritis, 345
- Non-A, non-B hepatitis. *See also* Hepatitis C virus  
   comparison of Ortho's EIA and RIBA II tests and, 8  
   histologic changes in liver biopsy specimens produced by recombinant interferon  $\alpha$ -2b therapy for chronic non-A, non-B viral hepatitis, 397
- Non-small-cell carcinoma, expression of proliferating cell nuclear antigen, epidermal growth factor receptor, and cathepsin D in non-small-cell carcinoma, 345
- Nonspecific esterase, in acute monocytic leukemia, 41
- Nonspherocytic hemolytic anemia, glucose-phosphate isomerase deficiency and nonspherocytic hemolytic anemia, 345

## Nuclear antigens

evaluation of commercial enzyme immunoassays compared to double immunodiffusion for antibodies to extractable nuclear antigens, 345

proliferating. *See* Proliferating nuclear antigens

## O

O-Acetylated sialomucins, mucin histochemical analysis in interpretation of Barrett's esophagus, 61

Oncogenes, p53 expression in neoplasms of uterine corpus, 81

Oncocytomas, renal, 587

Optimized kinetics, automated immunohistochemical analysis, S35

Oral anticoagulation, imprecision of prothrombin time monitoring of oral anticoagulation, 237

Ovarian carcinoma, DNA content and proliferative activity in ovarian small-cell carcinomas of hypercalcemic type, 579

Ovarian granulosa cell tumors, DNA content and tumor proliferative activity of adult-type ovarian granulosa cell tumors by image analysis, 345

## P

## Pancreas

immunohistochemical characterization of endocrine pancreas in mature teratomas and endocrine fetal pancreas, 345

intraoperative fine-needle aspiration of pancreatic lesions, 345

lymphoepithelial cyst of, 188

papillary cystic tumor of pancreas, 476, 478

serum anodal trypsinogen as marker of pancreas rejection in pancreaticoduodenal renal allografts, 345

unusual cytoplasmic inclusions in acinar cell carcinoma of pancreas, 345

## p53 antigen

expression in neoplasms of uterine corpus, 81

p53 and *c-erbB-2* protein expression in breast carcinomas, 408

proliferating cell nuclear antigen and p53 antigen expression in gastrointestinal stromal tumors, 345

## Papanicolaou smear

cell loss in conventional Papanicolaou smear, 345

comparative staining of *Pneumocystis carinii* in cytology smears with Diff-Quik, Papanicolaou, and silver methenamine, evaluation of sensitivity, turn-around time, and cost-effectiveness, 345

comparison of cytologic diagnoses using conventional Papanicolaou smears and parallel thin-layer cervical preparations using four collection device modalities, 345

one-slide, 345

Papillary cystic tumor, papillary cystic tumor of pancreas, 476, 478

Papilloma, human papillomavirus-related papillomas of male urethra, 345

## Paraffin sections

diagnosis of bone marrow involvement in hairy cell leukemia, with monoclonal antibody DBA.44, 26

DNA analysis by flow cytometric analysis of paraffin-embedded fine-needle core biopsy specimens of prostate, 345

rapid detection of Epstein-Barr EBER1 small nuclear RNA in formalin-fixed, paraffin-embedded tissue by RNA *in situ* hybridization, 345

results using paraffin media in hot-start polymerase chain reaction technique, 345

variation in reference cells for DNA analysis of paraffin-embedded tissue, 545

Parathyroid lesions, DNA quantitation in study of, 305

Pasco system, comparison of Kirby-Bauer, Microscan, Pasco, and Vitek systems for detection of methicillin-resistant *Staphylococcus aureus*, 345

*Pastuerella multocida*, *Pastuerella multocida* endocarditis, 565

Pathoblasts, pathoblasts as tool for recruiting medical students into pathology, 345

Pathogenesis, evidence that hepatitis D virus needs hepatitis B virus to cause hepatocellular damage, 554

Pathology education, 1

pathoblasts as tool for recruiting medical students into pathology, 345

Patient information system, design of flow cytometry patient information system, 345

Patient-specific probe, archival bone marrow aspirate slide material to construct a patient-specific probe to resolve discordant phenotypes in relapsed acute lymphoblastic leukemia, 345

## PCNA

PCNA in prostatic adenocarcinoma, correlation with established prognostic indicators, 345

proliferative cell fractions in cytology specimens, in esophageal carcinoma, 161

Peanut agglutinin, Peanut agglutinin and Lewis staining of peripheral T-cell lymphomas, 345

Percutaneous needle biopsy, diagnosis of inflammatory myopathy by percutaneous needle biopsy, demonstration of focal nature of myositis and, 345

Periosteal hemangioma, 345

## Peripheral blood

mononuclear cells

hepatitis C virus in peripheral blood mononuclear cells, 392

smears, bacteria in large activated circulating macrophages on peripheral blood smears taken at or near the time of blood culture collection, 345

Peroxidase, eosinophilic peroxidase deficiency, cytochemical and ultrastructural characterization of, 615

L-Phenylalanine, enzymatic determination of L-phenylalanine in serum, 345

Phenytol, concentrations in predialysis serum compared to postdialysis serum, in uremia treated by hemodialysis, 19

Plasma, evaluation of DVV test in detection of lupus inhibitors in plasma, 345

Plasma cell, systemic polyclonal B-immunoblastic proliferation with marked peripheral blood and bone marrow plasmacytosis, 222

Plasma exchange, evaluation of serum immunoglobulins by protein electrophoresis and rate nephelometry before and after therapeutic plasma exchange, 243

Plasmapheresis, evaluation of serum immunoglobulins by protein electrophoresis and rate nephelometry before and after therapeutic plasma exchange, 243

## Platelet

platelet-associated immunoglobulins, 637

platelet RNA content, 637

Platelet counting, proficiency testing of platelet counting in Ontario, 231

Platelet kinetics, dysplastic megakaryopoiesis with thrombocytopenia and chromosomal aberration, 227

Platelet membrane glycoproteins, 455

Platelets(s), rapid method to isolate platelets from human blood by density gradient centrifugation, 531

Ploidy. *See* DNA ploidy

*Pneumocystis carinii*

comparative staining of *Pneumocystis carinii* in cytology smears with Diff-Quik, Papanicolaou, and silver methenamine, evaluation of sensitivity, turn-around time, and cost-effectiveness, 345

detection of, monoclonal antibody and silver staining compared, 13

- Pneumonitis, early diagnosis of CMV pneumonitis in lung transplant patients, 345
- Polycystic kidney disease, *Pastuerella multocida* endocarditis, 565
- Polymerase chain reaction  
 automation and other recent developments in clinical chemistry, S31  
 comparison of polymerase chain reaction to Southern analysis for detection of immunoglobulin, heavy chain, gene rearrangements, 345  
 hepatitis C virus in peripheral blood mononuclear cells, 392  
 histopathologic and molecular profile of human cytomegalovirus infections in patients with heart transplants, 205  
 immunoglobulin heavy chain gene rearrangement study by, in colonic adenocarcinoma, 116  
 influence of Epstein-Barr virus genomes on patient survival in Hodgkin's disease, 319  
 optimization of DNA extraction for formalin-fixed tissue, in Duchenne muscular dystrophy, 98  
 polymerase chain reaction detection of myeloperoxidase mRNA in leukemic cells from Wright-stained or unstained smears, 345  
 predictive value of human papillomavirus DNA detection by filter hybridization and polymerase chain reaction in women with negative results of colposcopic examination, 489  
 results using paraffin media in hot-start polymerase chain reaction technique, 345
- Portable clinical analyzer, evaluation of portable clinical analyzer in emergency department setting, 345
- Potassium, evaluation of falsely normal potassium in thrombocytosis, 345
- Primitive neuroectodermal tumors  
 DNA analysis of primitive neuroectodermal tumors, 345  
 transplantation of congenital primitive neuroectodermal tumor of fetus to uterus of mother, biotin-labeled chromosome-specific probes applied in, 345
- Proerythroblasts, in acute erythroleukemia, prognostic significance, 34
- Proficiency testing, proficiency testing of platelet counting in Ontario, 231
- Progesterone receptors  
 p53 and *c-erbB-2* protein expression in breast carcinomas, 408  
 quantitation, by immunocytochemical and image analyses, 105
- Prognostic factors  
 correlation of image analysis determination of DNA content of endometrial adenocarcinoma with standard prognostic factors, 345  
 favorable prognostic indicators in mucinous carcinoma of breast, 345  
 influence of Epstein-Barr virus genomes on patient survival in Hodgkin's disease, 319  
 PCNA in prostatic adenocarcinoma, correlation with established prognostic indicators, 345
- Proliferating cell nuclear antigen  
 analysis of proliferative fraction in infiltrating ductal breast carcinoma using proliferating cell nuclear antigen in formalin-fixed embedded tissue, comparison with S-phase flow cytometric analysis, 345  
 assessment of proliferation in prostatic adenocarcinomas with proliferating cell nuclear antigen, 345  
 expression of proliferating cell nuclear antigen, epidermal growth factor receptor, and cathepsin D in non-small-cell carcinoma, 345  
 proliferating cell nuclear antigen and p53 antigen expression in gastrointestinal stromal tumors, 345  
 proliferating cell nuclear antigen immunoreactivity in cervical intraepithelial neoplasia, 345
- Prostate  
 DNA analysis by flow cytometric analysis of paraffin-embedded fine-needle core biopsy specimens of prostate, 345  
 growth and differentiation of normal prostatic glandular epithelium in collagen gel culture, 345
- Prostate-specific antigen, follow-up of patients with elevated serum prostate-specific antigen levels and negative initial prostate biopsies, 345
- Prostatic adenocarcinoma  
 assessment of proliferation in prostatic adenocarcinomas with proliferating cell nuclear antigen, 345  
 PCNA in prostatic adenocarcinoma, correlation with established prognostic indicators, 345
- Protein(s)  
 detection of cytoskeletal proteins immunoreactivity in cerebrospinal fluids of pseudotumor cerebri patients, 345  
 evaluation of serum immunoglobulins by protein electrophoresis and rate nephelometry before and after therapeutic plasma exchange, 243
- Protein A immunoadsorption  
 protein A immunoadsorption therapy for patients with acute and treatment-resistant immune thrombocytopenic purpura, 345  
 treatment of patients with chemotherapy-associated thrombocytopenic purpura/hemolytic uremic syndrome with protein A immunoadsorption, 345
- Protein chemistry, automation and other recent developments in clinical chemistry, S31
- Proteinuria, quantitative assessment of proteinuria from urinary protein/osmolality ratio in random urinalysis, 345
- Prothrombin, evaluation of liquid thromboplastin reagent for prothrombin testing, 345
- Prothrombin time, imprecision of prothrombin time monitoring of oral anticoagulation, 237
- Pseudocysts, lymphoepithelial cyst of pancreas, 188
- Pseudo-Gaucher histiocytes, congenital dyserythropoietic anemia type II diagnosed in 69-year-old patient with iron overload, 522
- Pseudosarcomatous tumors, of lower urinary tract, 269
- Pseudotumor cerebri, detection of cytoskeletal proteins immunoreactivity in cerebrospinal fluids of pseudotumor cerebri patients, 345

## Q

- Quality assurance, laboratory report forms for HIV-1 antibody testing, 199
- Quality control  
 method for independent assessment of accuracy of hematology whole-blood calibrators, 623  
 standards, proficiency testing of platelet counting in Ontario, 231
- Quality improvement, laboratory report forms for HIV-1 antibody testing, 199

## R

- Radiation exposure, determination of pathologist's radiation exposure dose from radioimmunoguided surgery tissue specimens, 345
- Radioimmunoassay, comparison of radioimmunoassay and enzyme immunoassay for salivary cotinine detection with gas chromatographic assay, 345
- Radioimmunoguided surgery, determination of pathologist's radiation exposure dose from radioimmunoguided surgery tissue specimens, 345
- Rapid methods  
 comparison of latex agglutination test for *Clostridium difficile* and rapid enzyme immunoassays for clostridial toxins versus tissue culture assay for cytotoxin B in stools of patients suspected of having *C. difficile*-associated diarrhea, 345

- rapid detection of Epstein-Barr EBER1 small nuclear RNA in formalin-fixed, paraffin-embedded tissue by RNA *in situ* hybridization, 345
- rapid method to isolate platelets from human blood by density gradient centrifugation, 531
- rapid therapeutic monitoring of anticonvulsants in whole blood using Biotrak turbidimetric latex agglutination assay, 345
- Recombinant immunoblot assay, recombinant immunoblot assay in assessment of hepatitis C virus infections, 345
- Recurrence, evidence that hepatitis D virus needs hepatitis B virus to cause hepatocellular damage, 554
- Red blood cells
- automation in blood banking, S17
  - coherence, automation in blood banking, S17
  - method for independent assessment of accuracy of hematology whole-blood calibrators, 623
- Refractory thrombocytopenia, 502
- Renal cell carcinoma
- renal oncocytoma *versus* renal cell carcinoma, 587
- Report content, laboratory report forms for HIV-1 antibody testing, 199
- Reticulocytes, comparison of flow cytometric analyses of reticulocytes *versus* manual method, 345
- Reverse transcription, hepatitis C virus in peripheral blood mononuclear cells, 392
- Rheumatoid arthritis, flow cytometry in monitoring immunologic response to nitrogen mustard therapy in rheumatoid arthritis, 345
- Rheumatologic disorders, anti-glycosphingolipid autoantibodies in rheumatologic disorders, 345
- RIBA II band patterns, EIA compared with, for hepatitis C testing, 8
- Richter's transformation, small B-cell lymphoid neoplasms with coexisting T-cell lymphomas, 424
- Robotics
- automation and other recent developments in clinical chemistry, S31
  - laboratory automation systems, S3
- Rosettes, cellular
- in multiple myeloma, 630
- S**
- Sample preparation, reproducibility study of ThinPrep sample preparation process, 345
- Sarcoma, epithelioid, vimentin-negative, 345
- Selective medium, evaluation of commercial blood-containing media for cultivation of *Mycobacterium haemophilum*, 282
- Sensitivity, comparative staining of *Pneumocystis carinii* in cytology smears with Diff-Quik, Papanicolaou, and silver methenamine, evaluation of sensitivity, turn-around time, and cost-effectiveness, 345
- Serum electrolytes, possible matrix effect of lyophilized proficiency testing materials when measuring serum electrolytes and calculating anion gap, 345
- Serum ferritin assay, serum ferritin measurement and degree of agreement using four techniques, 511
- Serum protein electrophoresis, evaluation of serum immunoglobulins by protein electrophoresis and rate nephelometry before and after therapeutic plasma exchange, 243
- Sialosyl-Tn antigen, distribution in normal tissues and expression in adenocarcinomas, 167
- Silicone
- silicon arthroplasty, 594
  - silicone identification in soft tissues by electron probe X-ray microanalysis, 345
  - silicone osteolysis after arthroplasty, 594
  - silicone synovitis, 594
- Silver methenamine, comparative staining of *Pneumocystis carinii* in cytology smears with Diff-Quik, Papanicolaou, and silver methenamine, evaluation of sensitivity, turn-around time, and cost-effectiveness, 345
- Silver staining, detection of *Pneumocystis carinii* and, monoclonal antibody and silver staining compared, 13
- Single-chain urokinase, excessive fibrinolysis in amyloidosis associated with elevated plasma single-chain urokinase, 534
- Skeletal angiomatosis, 345
- Small-cell carcinoma, DNA content and proliferative activity in ovarian small-cell carcinomas of hypercalcemic type, 579
- Small intestine, stromal tumors of small intestine, clinicopathologic and immunohistochemical studies of, 345
- Smear
- bacteria in large activated circulating macrophages on peripheral blood smears taken at or near the time of blood culture collection, 345
  - comparative staining of *Pneumocystis carinii* in cytology smears with Diff-Quik, Papanicolaou, and silver methenamine, evaluation of sensitivity, turn-around time, and cost-effectiveness, 345
  - Papanicolaou. *See* Papanicolaou smear
  - polymerase chain reaction detection of myeloperoxidase mRNA in leukemic cells from Wright-stained or unstained smears, 345
  - proliferative cell fractions in cytology specimens, in esophageal carcinoma, 161
- Smooth muscle, pulmonary smooth muscle and myofibroblastic proliferations, 345
- Soft tissues, silicone identification in soft tissues by electron probe X-ray microanalysis, 345
- Software, automated review of blood donor screening test patterns at regional blood center, 334
- Southern analysis, comparison of polymerase chain reaction to Southern analysis for detection of immunoglobulin, heavy chain, gene rearrangements, 345
- Sperm, prefixation, preembedding immunogold labeling of live human sperm, 345
- S phase, DNA content and proliferative activity in ovarian small-cell carcinomas of hypercalcemic type, 579
- Sphenocliput, chordomas and chondroid tumors of sphenocliput, 345
- Spindle cell hemangioendothelioma, nonspecific nature of spindle cell hemangioendothelioma, 545
- Splenectomy, red pulp splenic infiltrates in peripheral T-cell lymphomas diagnosed by splenectomy, 345
- Splenic infiltrates, red pulp splenic infiltrates in peripheral T-cell lymphomas diagnosed by splenectomy, 345
- Squamous cell carcinoma, cervical, angiogenesis and cervical squamous cell carcinoma, 345
- Squamous intraepithelial lesion, predictive value of human papilloma-virus DNA detection by filter hybridization and polymerase chain reaction in women with negative results of colposcopic examination, 489
- Staining
- acid fast and fungus stains in bone marrow of HIV-infected patients, need for, 345
  - assessment of *Mycobacterium avium-intracellulare* infection using blood cultures and bone marrow biopsy specimens stained with Kenyon and Fites stains, anti-BCG, and anti-*M. duvali*, effects of liposomal gentamicin therapy and, 345
  - detection of *Pneumocystis carinii* and, monoclonal antibody and silver staining compared, 13
  - FACSPrep for automated whole-blood lysis and staining as cost-effective tool in flow cytometric analysis for lymphocyte surface markers, 345
  - Peanut agglutinin and Lewis staining of peripheral T-cell lymphomas, 345

- polymerase chain reaction detection of myeloperoxidase mRNA in leukemic cells from Wright-stained or unstained smears, 345
- Staphylococcus aureus*, comparison of Kirby-Bauer, Microscan, Pasco, and Vitek systems for detection of methicillin-resistant *Staphylococcus aureus*, 345
- Statistics, non-unit-producing activities in large microbiology laboratory, 287
- Stromal tumors
- proliferating cell nuclear antigen and p53 antigen expression in gastrointestinal stromal tumors, 345
  - stromal tumors of small intestine, clinicopathologic and immunohistochemical studies of, 345
- Sulphomucins, mucin histochemical analysis in interpretation of Barrett's esophagus, 61
- Suppressor phenotype, major phenotype of large granular T-cell lymphoproliferative disorder, 516
- Susceptibility testing, automation in clinical microbiology, S22
- Synovial hemangioma, primary, 345
- Systemic lupus erythematosus, clinical significance of immunoglobulin A versus immunoglobulins G and M anti-cardiolipin antibodies in patients with systemic lupus erythematosus, 449
- T**
- t(1;22)(p13;q13), acute megakaryoblastic leukemia in infants with t(1;22)(p13;q13) abnormality, 214
- Tadpolelike cells
- in multiple myeloma, 630
- Tangier disease, coronary atherosclerosis with near absence of high-density lipoprotein cholesterol in, 191
- T-cell lymphoma
- composite B-cell and T-cell lymphoma, 387
  - Peanut agglutinin and Lewis staining of peripheral T-cell lymphomas, 345
  - red pulp splenic infiltrates in peripheral T-cell lymphomas diagnosed by splenectomy, 345
  - small B-cell lymphoid neoplasms with coexisting T-cell lymphomas, 424
- T-cell lymphoproliferative disorder
- major phenotype of large granular T-cell lymphoproliferative disorder, 516
  - primary Epstein-Barr virus infection with clonal T-cell lymphoproliferation, 324
- Technologies, advances in past decade in automated hematology, S11
- Teratoma, immunohistochemical characterization of endocrine pancreas in mature teratomas and endocrine fetal pancreas, 345
- Terminal deoxynucleotidyl transferase analysis, flow cytometry terminal deoxynucleotidyl transferase analysis, evaluation of Triton-X and methanol permeabilization methods in comparison to immunofluorescence microscopic examination for, 345
- Thin-layer cervical preparations, comparison of cytologic diagnoses using conventional Papanicolaou smears and parallel thin-layer cervical preparations using four collection device modalities, 345
- Thin-needle aspiration, breast carcinoma simulating fibroadenoma or fibrocystic change by fine-needle aspiration, 155
- ThinPrep, reproducibility study of ThinPrep sample preparation process, 345
- Thrombocytopenia
- clinical significance of immunoglobulin A versus immunoglobulins G and M anti-cardiolipin antibodies in patients with systemic lupus erythematosus, 449
  - dysplastic megakaryopoiesis with thrombocytopenia and chromosomal aberration, 227
  - measurement of thrombopoiesis, 637
  - refractory thrombocytopenia, 502
- Thrombocytopenic purpura
- protein A immunoadsorption therapy for patients with acute and treatment-resistant immune thrombocytopenic purpura, 345
  - treatment of patients with chemotherapy-associated thrombocytopenic purpura/hemolytic uremic syndrome with protein A immunoadsorption, 345
- Thrombocytosis, evaluation of falsely normal potassium in thrombocytosis, 345
- Thrombopoiesis
- rate of measured in study of platelets with increased RNA content, 637
- Thromboplastin
- evaluation of liquid thromboplastin reagent for prothrombin testing, 345
  - imprecision of prothrombin time monitoring of oral anticoagulation, 237
- Thrombosis
- association of type of thrombosis and risk factors with abnormal thrombotic profiles, 345
  - clinical significance of immunoglobulin A versus immunoglobulins G and M anti-cardiolipin antibodies in patients with systemic lupus erythematosus, 449
  - thrombus formation on intravascular oxygenation device, 345
- Thyroid, black thyroid associated with neoplastic and non-neoplastic diseases, 345
- Tissue culture, comparison of latex agglutination test for *Clostridium difficile* and rapid enzyme immunoassays for clostridial toxins versus tissue culture assay for cytotoxin B in stools of patients suspected of having *C. difficile*-associated diarrhea, 345
- Tissue specimens, determination of pathologist's radiation exposure dose from radioimmunoguided surgery tissue specimens, 345
- Total laboratory testing process, laboratory report forms for HIV-1 antibody testing, 199
- Transplantation
- DNA fingerprinting and nonradioactive hybridization to assess engraftment in bone marrow transplantation, 345
  - early diagnosis of CMV pneumonitis in lung transplant patients, 345
  - Epstein-Barr virus-associated anaplastic large cell lymphoma in renal transplant patients, 312
  - Epstein-Barr virus-infected cells in blood or bone marrow of bone marrow transplant patients, 345
  - evidence that hepatitis D virus needs hepatitis B virus to cause hepatocellular damage, 554
  - fatal disseminated *Conidiobolus coronatus* infection in renal transplant patient, 559
  - histopathologic and molecular profile of human cytomegalovirus infections in patients with heart transplants, 205
  - late pulmonary complications in adult bone marrow transplant recipients, 345
  - morphology of postcardiac transplant lymphomas, 345
  - recurrence of syndrome of primary biliary cirrhosis after orthotopic liver transplantation, 345
  - serum anodal trypsinogen as marker of pancreas rejection in pancreaticoduodenal renal allografts, 345
- Triton-X, flow cytometry terminal deoxynucleotidyl transferase analysis, evaluation of Triton-X and methanol permeabilization methods in comparison to immunofluorescence microscopic examination for, 345
- Trypsinogen, serum anodal trypsinogen as marker of pancreas rejection in pancreaticoduodenal renal allografts, 345
- Tumor DNA content, DNA content and tumor proliferative activity of adult-type ovarian granulosa cell tumors by image analysis, 345

- Tumor proliferative activity, DNA content and tumor proliferative activity of adult-type ovarian granulosa cell tumors by image analysis, 345
- Tumor size, correlation of tumor angiogenesis, tumor size, nodal status, and metastasis in lung carcinoma, 345
- Tumor suppressor genes  
p53 and *c-erbB-2* protein expression in breast carcinomas, 408  
p53 expression in neoplasms of uterine corpus, 81
- Turn-around time, comparative staining of *Pneumocystis carinii* in cytology smears with Diff-Quik, Papanicolaou, and silver methenamine, evaluation of sensitivity, turn-around time, and cost-effectiveness, 345

## U

- Ulcerative colitis, chronic, multiple microcarcinoids in, 112
- Ulcrogenesis, 549
- Ultrastructural analysis  
black thyroid associated with neoplastic and non-neoplastic diseases, histochemical and ultrastructural analysis of, 345  
eosinophilic peroxidase deficiency, cytochemical and ultrastructural characterization of, 615  
malignant adenomyoepithelioma of the breast, 598
- Undertransfusion, 150
- Uremia, treatment of patients with chemotherapy-associated thrombocytopenic purpura/hemolytic uremic syndrome with protein A immunoadsorption, 345
- Uremic compounds, phenytoin concentrations in predialysis serum compared to postdialysis serum, in uremia treated by hemodialysis, 19
- Urethra, human papillomavirus-related papillomas of male urethra, 345
- Urinalysis, quantitative assessment of proteinuria from urinary protein/osmolality ratio in random urinalysis, 345
- Urinary tract, pseudosarcomatous tumors of, 269
- Urine, detection of antibodies to hepatitis C virus in urine, 345
- Urine culture, computer "smart" system to modify urine culture protocol, 345
- Urine dipstick tests, inaccurate results of, 269
- Urokinase, excessive fibrinolysis in amyloidosis associated with elevated plasma single-chain urokinase, 534
- Uterus, p53 expression in neoplasms of uterine corpus, 81

## V

- Vaginal diagnoses, Bethesda system for reporting, 152
- Vascular function, modulation of vascular function, measured using molecular markers of endothelial function in patients undergoing contrast angiography, 345
- Vasculitic disease, anti-neutrophil cytoplasmic antibody to distinguish between vasculitic disease activity and complications of cytotoxic therapy, 345
- Verification, automated review of blood donor screening test patterns at regional blood center, 334

- Villus atrophy, in gastrointestinal microvillus inclusion disease, 119
- Vimentin, vimentin and keratin staining in low-grade granular renal neoplasms, 345
- Virus-associated hemophagocytic syndrome, primary Epstein-Barr virus infection with clonal T-cell lymphoproliferation, 324
- Vitek system, comparison of Kirby-Bauer, Microscan, Pasco, and Vitek systems for detection of methicillin-resistant *Staphylococcus aureus*, 345
- Vulvar dystrophies, detection of human papillomavirus type 16 in vulvar dystrophies, 345

## W

- White blood cell differential, evaluation of CELL-DYN 3000 differential, 603
- Whole-blood assay, fibrinogen measurement using bedside whole-blood assay, 345
- Workload, efficacy of real-time interactive display of stat workload information, 345
- Workload measurement, non-unit-producing activities in large microbiology laboratory, 287
- Workload units, non-unit-producing activities in large microbiology laboratory, 287
- Workstations, inexpensive image analysis workstation for surgical pathology laboratory, 345
- Wright stain, polymerase chain reaction detection of myeloperoxidase mRNA in leukemic cells from Wright-stained or unstained smears, 345

## Z

- Zygomycosis, fatal disseminated *Conidiobolus coronatus* infection in renal transplant patient, 559

**Abstracts of Papers and Poster Presentations, Scientific Sessions of the Fall Meeting of the American Society of Clinical Pathologists and the College of American Pathologists, October 10-16, 1992, Las Vegas, Nevada, 345**

**Book Reviews**

- Cytopathology Annual: 1992*, 268  
*Developmental Pathology of the Embryo and Fetus*, 464  
*Immunology*, 381  
*World Health Organization International Classification of Tumors: Histological Typing of Tumors of the Upper Respiratory Tract and Ear, Second Edition*, 464

**Correspondence and Corrections**, 139, 269, 382, 466, 545

**Inaugural Address**, 253

**In Memoriam**

- Elmer R. Jennings, 380  
Joseph C. Sherrick, 138

**Minutes of the Annual Business Meeting of the American Society of Clinical Pathologists, September 24, 1991, New Orleans Convention Center**, 257

**News and Notices**, 143, 273, 385, 471, 547, 651

## INDEX OF AUTHORS

- Abu-Alfa, Amer, 19  
 Agostini, Rocco M., Jr., 119  
 Aguirre-Garcia, Jesus, 141  
 Aine, Risto, 319  
 Alavaikko, Martti J., 319  
 Albores-Saavedra, Jorge, 478  
 Alexander, Graeme J. M., 554  
 Al Saati, Talal, 26  
 Alvarado, Carlos S., 214  
 Amin, Mahul B., 13  
 Amsden, Thomas W., 424  
 Ansell, Jack E., 237  
 Arbustini, Eloisa, 205  
 Argyle, C. A., 55  
 Arosemena, Juan Ramon, V., 141  
 Ashfaq, R., 55  
 Ashton, John K., S11  
 Attadia, Vincenza, 437  
 Ault, K. A., 637  
 Ayala, Alberto G., 271, 603  
 Aziz, Douglas C., 105
- Badrick, Tony, 249  
 Ballas, Samir K., 243  
 Balogh, Karoly, 594  
 Baracchini, Patrizia, 61  
 Barbareschi, Mattia, 408  
 Befrits, R., 575  
 Bell, Debra A., 579  
 Benenson, Abram S., 199  
 Berard, Paul, 534  
 Berman, Jules J., 334  
 Bizzaro, Nicola, 615  
 Blanco, Guillermo, 319  
 Bloomfield, Clara D., 430
